

## Philotech - We love Engineering

For more than 30 years we have been a strategic development partner in Germany, France, Spain and UK for our customers in the aerospace, defence, automotive, transportation and telecommunications industries. As a company of the Bertrandt Group, we stand for innovation and quality within our core competencies Software Engineering, Validation & Verification, Systems Engineering, Support Engineering, Functional Safety as well as IT & Embedded Security. Our experts accompany projects from conception through implementation to successful completion.

## Certification / Qualification Engineer (m/w/d) Governmental (Ref.-Nr.: 2021-1156)

Location: Donauwörth

### Your tasks:

- Support the certification and qualification activities, including all associated project management tasks (planning, reporting, risk management...)
- Contribute to the establishment of the certification requirement baselines and type design definitions for future evolutions of the helicopter and coordinate their harmonization
- Develop and harmonize (internally / externally) the certification & qualification programs, including the identification of the Means of Compliance and associated demonstrations of compliance
- Coordinate the creation and delivery of those compliance demonstrations in accordance with the general milestones provided by the Chief Engineering team
- Manage the Airbus Helicopters Airworthiness network to ensure certification objectives are met
- Validate those demonstrations of compliance and harmonize them with Authorities
- Produce the certification / qualification synthesis documents and support in the harmonization of them with authorities
- Prepare airworthiness documentation for release to the Aviation Authorities or for approvals in accordance with Airbus Military Design Organization Approval (DOA)
- Influence and contribute to the harmonization of the future qualification (e.g. in the frame of offers, ...)
- Contribute to the approval of flight clearance for serial and prototype flights

### Your profile:

- A university degree in aeronautics or mechanical engineering

- Experience in the certification and qualification of aircrafts/helicopters and/or aircraft /helicopter systems
- Experience in the development of aircrafts/helicopters or aircraft/helicopter systems
- Experience of working in international projects and collaboration in a transnational team across borders would be a plus
- Very good german and english skills
- Good Ms-Office skills
